150 Half Round Gutter

150 Half Round Flatback Gutter

Complement Existing Metroll Rainwater Products

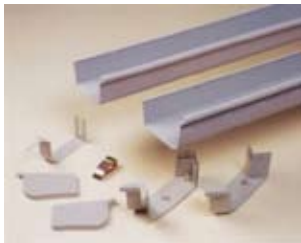

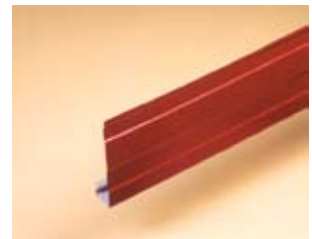

Fascia Gutter

Designed with a square profile to match the fascia, it features high carrying capacity fascia gutter and comes with a return on rear gutter for fixing to roof sheeting.

Metroline Fascia Cover

Metroll Hi-Tensile Metal Fascia Cover is designed and engineered to cover existing timber fascia.

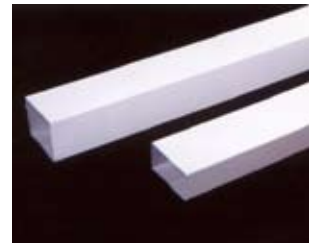

Hi Front Quad 115 Gutter

This architectural style gutter features an extended face that conceals the roofline. It is especially popular for use in new buildings.

Downpipes

Downpipes are manufactured in two standard sizes 100 x 50mm and 100 x 75mm and come in 2400mm length.

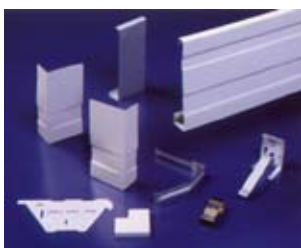

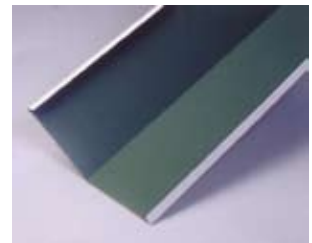

Quad 115 Gutter

This popular traditional style gutter is used for new buildings as well as matching older installations.

Valley Flashings

All Valley Flashings are available in a full range of colours to match roof sheeting and cut to maximum length of 8 metres.

Metroline Fascia

Manufactured to exacting standards, Metroline does not experience any of the timber issues such as warping and shrinking.

Flashing Range

The extensive range of Metroll flashings, barge ends, corner trims and foot moulds have been designed and manufactured to enrich the appearance of all gutter, roofing and architectural applications.
